Education

San Diego State University – B.S. in Computer Science | Aug 2025 – Jun 2027 | GPA: 3.8/4.0

San Diego Mesa College – A.S. in Computer Science | Jan 2022 – Jun 2025

Skills

- Tools: React, React Native, Tailwind CSS, Bootstrap, AWS, VS Code, Git/GitHub, Agile, CI/CD fundamentals, Testing & Debugging, Git/GitHub, Linux, Xcode
- Languages: HTML5, CSS3, JavaScript, TypeScript, Python (basic), C++ (basic), Java, Swift
- Backend & Runtime: Node.js, Express
- Databases: MongoDB, Realm, Firebase, PostgreSQL

Work Experience

IT Intern | Kugan & Associates, Inc | Feb 2023 - Present

- Maintained and updated Excel-based databases, ensuring accuracy and resolving file conflicts.
- Registered students on training platforms and supported account setup and user management.
- Operated and monitored Zoom sessions, troubleshooting connectivity and technical issues in real time.
- Delivered technical support for software installation and basic system troubleshooting.

Projects

Coffee Study Spot Finder

- Full-stack web app helping students locate nearby study-friendly coffee shops.
- Frontend: React
- Backend: Python (Flask/FastAPI)
- Integrated Google Maps API and Ollama (Qwen model).
- Containerized and deployed using Docker & Docker Compose.

Electronics Shopping Website

- Developed responsive e-commerce front-end with HTML5, CSS3 (Flexbox/Grid), and JavaScript.
- Developed product cards, navigation menu, and category filtering.
- Enhanced for performance (lazy loading, minification) and cross-browser compatibility.
- Deployed with GitHub Pages.

iPhone Book App

- Built iOS app in Swift with Realm (local storage) and MongoDB backend, integrating a basic REST API for data access (Basic).
- Imported CSV files for chapters, references, and content storage.
- Implemented keyword search and custom text highlighting.
- Applied MVC pattern for maintainable architecture.

Other Online Courses

LangChain for LLM Application Development – Coursera (Completed Jan 2025)

Learned to build LLM-powered applications using LangChain, prompt engineering, and chain configurations for real-world use cases.
