San Diego, CA • 619-394-1775 • joytran10899@gmail.com

PROFESSIONAL SUMMARY

Computer Science student and developer with hands-on experience building iOS, and full-stack web features. Comfortable working across React/TypeScript, Swift, Node/Express, SQL databases, and cloud-backed APIs, with a focus on maintainable code and practical product delivery.

EDUCATION

San Diego State University - B.S. in Computer Science	Aug 2025 - Dec 2026
San Diego Mesa College - A.S. in Computer Science	Jan 2022 - Jun 2025

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C++, Swift, Kotlin
Frontend & Design: React, HTML5, CSS3, Tailwind CSS, Bootstrap, Figma
Backend & Data: Node.js, Express, SQL, PostgreSQL, MongoDB, Firebase, Realm
Cloud & DevOps: AWS (EC2, S3), Docker, Git/GitHub, CI/CD, Linux
Tools & AI: VS Code, Xcode, Jira, Claude, Codex, Gemini

EXPERIENCE

Frontend Engineering Intern Scout	Aug 2026 - December 2026
• Build and ship features across Scout's iOS app and browser extensions, contributing to production software used by real users. • Work within a .NET/C# API stack on AWS (ECS, RDS, API Gateway) using SQL Server and Dapper ORM. • Contribute to the Swift iOS codebase, squash bugs, improve performance, and collaborate directly with the founder and engineering team. • Write clean, documented, maintainable code that teammates can extend and review efficiently.	

PROJECTS

Momentum — Full-Stack Fitness Consistency Platform	CodePath WEB103
• Collaborated in a 4-person team to develop a full-stack fitness platform using React, React Router, Tailwind CSS, Vite, Node.js, Express, and PostgreSQL. • Implemented JWT authentication in httpOnly cookies, RESTful CRUD APIs, personalized workout generation, workout history, filtering, and accountability groups. • Built role-based admin authorization and responsive dashboard/library experiences; deployed the application on Render.	
Coffee Study Spot Finder	Hackathon SDSU 2025
• Collaborated in a 4-person hackathon team to build a full-stack application with React and Python; integrated APIs, Docker, AWS deployment, and Ollama-powered recommendations.	
Mini Universal Studio Simulation	C++
• Developed a theme-park simulation using AVL trees, hash tables, stacks, queues, graphs, and heaps; built the GUI with ImGui, SDL2, and OpenGL3.	
iPhone Book App	Swift
• Built an iOS reading application using Swift with Realm and MongoDB, including backend data access and search functionality.	

CERTIFICATIONS

CodePath — Advanced Web Development	Summer 2026
Coursera — LangChain for LLM Application Development	Jan 2025
